                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              셤
                                                                                                                                                                                                                                                                                                                                                                                   The present DNA sequence is a fusion construct pIL2LsolCD19, comprising leader peptide of human interleukin 2 (hIL2), 12 amino acids from the mature N-terminus of hIL2 and soluble CD19 (solCD19) coding region, having apyrase activity. This produces high levels of solCD19 expression and activity in the transfected cells. Soluble CD39 is constructed by removing the N- and C-terminal transmembrane domains. It retains the capacity to metabolise ATP and ADP at relevant concentrations and the ability to block and reverse ADP-induced platelet activation and recruitment, including platelet aggregation. Soluble CD39 polypeptides are useful for inhibiting amgiogenesis. It is useful for the treatment of unstable angina, myocardial infarction, stroke, coronary artery disease or injury, atherosclerosis, peripheral vascular occlusion, preeclampsia, cambolism, platelet-associated ischaemic disorders including lung, coronary and cerebral ischaemia, thrombosic disorders including coronary, peripheral and cerebral artery thrombosis, intracardiac and venous thrombosis, coagulopathy, deep venous thrombosis (DVT), pulmonary embolism (PE) and transient ischaemic attack. Soluble CD39 is also useful for preventing thrombus formation or reformation, occlusion, reocclusion, seconlusion, stenosis or restenosis of blood vessels or stroke
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                240

```
The present sequence is coding region of pIL2SolCD39, a fusion construct encoding acl (soluble)(CD39 having apyrase activity. Fusion of 12 amino acids from the N-terminus of mature human IL2 to the solCD39 coding region results in high levels of both expression and activity in the supernatants of transfected cells. This is used in the treatment of unstable angina, myocardial infartion, stroke, coronary artery disease or injury, atherosclerosis, peripheral vascular occlusion, preeclampsia, embolism, platelet-associated ischaemia ciscoder including lung ischaemia, coronary ischaemia and cerebral ischaemia, thrombosis, disorder including coronary artery thrombosis, cerebral artery thrombosis, intracardiac thrombosis, peripheral artery thrombosis, venous thrombosis,
                                                                                                            unstable angina; myocardial infarction; stroke; coronary artery disease; atherosclerosis; peripheral vascular occlusion; preeclampsia; embolism; platelet-associated isohaemic disorder; lung ischaemia; thrombolytic; cerebral ischaemia; thrombolic disorder; coronary artery thrombosis; cerebral artery thrombosis; intracardiac thrombosis; venous thrombosis; peripheral artery thrombosis; coagulopathy; deep venous thrombosis; psripheral artery thrombosis; coagulopathy; deep venous thrombosis; psripheral artery thrombosis; ransient ischaemic attack; thrombus formation; occlusion; stenosis; restenosis; antianginal; cardiant; cerebroprotective; antiarteriosclerotic; vasotropic; anticoagulant; coronary ischaemia; vascular occlusion; ss.

The present DNA sequence is a fusion construct pIL2IrFlagSolCD39, comprising the leader peptide of human interleukin 2 (hIL2), 12 amino acids from the mature N-terminus of hIL2, a linker, FLAG tag sequence and soluble CD39 (solCD39) coding region, that has apyrase activity. This produces high levels of solCD39 sepression and activity in the cranisacted calls. Soluble CD39 is constructed by removing the N- and C-terminal transmembrane domains. It retains the capacity to metabolise ATP and ADP at relevant concentrations and the ability to block and reverse ADP-induced platelet activation and recruitment, including platelet aggregation. Soluble CD39 polypeptides are useful for inhibiting angiogenesis. It is useful for the treatment of unstable angina, myocardial infarction, stroke, coronary artery disease or injury, capacites, peripheral vascular occlusion, precelampsia, embolism, clastelet-associated ischaemic disorders including coronary and cerebral artery thrombosis, intracactiac and venous thrombosis, coagulopathy, deep venous thrombosis, intracactiac and venous thrombosis. Coagulopathy, deep venous thrombosis (DVT), pulmonary embolism (PE) and thrombosis or transient ischaemic attack. Soluble CD39 is also useful for preventing chrombosis or thrombosis
